

Industrial applications

Session organizers

1. Marcela Goldschmit, Sim&Tec S. A., Buenos Aires, Argentina.
2. Jose M Risso, CIMEC - INTEC, Universidad Nacional del Litoral, CONICET, Santa Fe, Argentina.

Description

The objective of this session is to bring together researchers, engineers and students to exchange ideas and information on the implementation of computational methods in solving industrial problems involving topics of solid mechanics, fluid mechanics and heat and mass transfer. Applications of aerospace, shipbuilding, automotive, chemical, steel, and others, may be presented in the session.
