

# Simulation of turbulent flows

## Session organizers

1. Mariano Cantero, Centro Atómico Bariloche (CNEA), CONICET, Instituto Balseiro, San Carlos de Bariloche, Argentina.

2. Hugo Castro, Grupo de Investigación en Mecánica de Fluidos (GIMEF), Universidad Tecnológica Nacional, Facultad Regional Resistencia (UTN FRRe), CONICET, Resistencia, Argentina.

3. Facundo Del Pin, Livermore Software Technology Corporation, EEUU.

4. Rodrigo R. Paz, Livermore Software Technology Corporation, EEUU - CONICET, Argentina.

## Description

This session will focus on the modeling and simulation of turbulent flows. The session seeks to draw contributions from different fields ranging from basic research to applications, and different modeling and simulation techniques such as direct numerical simulation, large eddy simulation and to RANS modeling.
