

Numerical simulation in porous media

Session organizer

1. Federico E Teruel, Centro Atómico Bariloche (CNEA), CONICET, Instituto Balseiro, San Carlos de Bariloche, Argentina.

Description

A wide range of topics related to classical and emerging areas of porous media applications will be covered. This session will mainly focus on advanced mathematical approaches to the modeling of porous media, advances in numerical techniques and novel numerical and analytical for the solution of porous media equation in multidimensional and complex geometry.
